

PRODUCTION

In Production mode the 'timeline' dominates the view. The timeline can be posted to only by members of the creative team behind the project. It becomes very much like a dynamic timeline production Dropbox.

Creatives can post regular text posts and video, photo, music etc. The Originator will have set the specific timeframe for a specific project before it goes 'Live' in Production mode and so the timeline will be scaled to that. The Timeline can also be enlarged and minimised accordingly.
